REMD SECTION

May 19, 1989

MEMORANDUM

SUBJECT: Addendum, Draft Field Operations Plan(FOP), and Revision 2, Draft Quality Assurance Project Plan(QAPjP) Galena Subsite Mine Waste Characterization (MWC) Cherokee County, KS, Tri-State Mining District

FROM: Douglas J. Brune, Environmental Engineer, ENSV

TO: Alice C. Fuerst, REMD/SPFD/WSTM

THRU: Dale I. Bates, RQAO/ENSV *CPH*

The subject documents, prepared by CH2M-Hill, and dated May 1989 (It appears the FOP was erroneously dated May 1988.), has been reviewed as requested. Below are specific comments resulting from this review:

Addendum 1.

1. It is not known why a discussion of the x-ray fluorescence data obtained from the November 1988 MWC effort was not included in the Introduction section. It appears this information would be beneficial for this "... additional field characterization and sampling episode." (Page 1.)

QAPjP

2. It is recommended that a Review and Approval Signature page be updated for this QAPjP revision.

If you have any questions, please contact me at 236-3881.
